- Loaded software, granted permissions and configured hardware for new employees as part of onboarding process.
- Performed tests of functionality, security and performance of different workstations and devices.
- Reviewed system and network performance to make proactive adjustments based on established IT policies.

PROJECTS

- **Graduation Project:** As part of my graduation project I worked with a team and we were entrusted with making a website and an application where a photographer can login and upload a photograph, and different clients can likewise view the photograph, give a rating to the photograph and comment on the photograph. We all had a task to perform and I was given the task of creating the webpage where the photographer could upload a photograph. I had the opportunity of learning HTML programming because that is what we had to use for the project. This also gave me the opportunity to improve on my communication skills and also learning how to work with a team.
- **Database Project:** Developing a database for storing data. My team were tasked with creating a database for an airport. I learnt how to use MySQL for writing queries and creating databases.

HOBBIES

- I love participating in sporting activities like football, volleyball and long tennis.
- I enjoy video-gaming, reading and listening to music
